- Transfer by phone, online or via our mobile app

Great savings through precise timing

Exchange rates move, at quite a rapid pace. When political and economic uncertainty is rife, it's not uncommon to see major currency pairs fluctuate by 10% in a matter of weeks.

Here's an example of one of those periods:

What we'll do to help you transfer at the right time, is give you market guidance. We do this through friendly consultation in person or over the phone, helping give you the simplified facts for you to base your decision on.

We also offer Rate Alerts - where you can set up email and SMS alerts to be sent to you when your target exchange rate is met, for the amount you requested.

How it works

- 1 **Agree your currency amount and exchange rate**

You can do this either online, over the phone or via our app

- 2 **Tell us where to send the currency**

This is usually in the form of an IBAN or bank account details

- 3 **Make a payment to us**

You can do this by debit card or by transferring money into our bank account
